TITLE : INTERACTIVE GRAPHIC SYSTEM

ABSTRACT : PURPOSE: To enable plural persons to simultaneously process a large group of graphic data and also to easily develop an application that has such a dispersive input function.

CONSTITUTION: The data 2 to be processed are stored in a work station WS1 out of plural work stations WS1...WSn which are connected to a network 5. Then the data 2 are divided and displayed at these work stations. The workers simultaneously process those divided data 2 by operating the mouses, etc., provided on each work station. A means is added to a window system 1 to attain a dispersive input environment, and an editing window, etc., are reproduced by a window reproducing means 1g. Thus the windows are provided on other work stations.
